(54) PROGRAM AUTHORITY INFORMATION DATA STRUCTURE

(57)Abstract:

PURPOSE: To provide reliable security even in the case of an operation with a complicated data structure, for example, an object including user's own program instructions transmitted between users.

CONSTITUTION: In a computer system provided with a processing means 2 for execution of plural programs and a memory means 7 for storage of program instructions and data, a program authority information data structure includes a means for storage of plural authority entries, and each entry qualifies operations that related programs are allowed to execute, and further, a means which stores data, which relates the authority entry to at least one program, in at least one segment is included.
